To Whom It May Concern

The Paiton II Power Station is owned by PT Jawa Power (JP) and operated by PT. YTL Jawa Timur (YTLJT) at Paiton, Indonesia

The power station includes two power generation units designated as Unit 5 and Unit 6. Each unit has one boiler supplying 564 kg/s at 175 bars of super-heater outlet steam to the turbine at maximum continuous rating of 610MW per unit.

In November, 2010, YTLJT, on behalf of JP, issued a purchase order for the supply of 504 cold end baskets for the station Air Heaters to Geeco Enercon Pvt. Ltd., Tamilnadu, India. The specification included the following:

- 504 cold end baskets for Air Heater
- Per Owner designated configuration
- Depth 305 mm
- Thickness 22 gauge
- LACR enameled, min. 0.15 mm each side
- Low carbon steel
- Frame: Corten ASTM A242/ A588, 5 mm, full wrap

Geeco provided these baskets at a reasonable price, with good quality manufacturing & enameling, and on schedule. The performance of these baskets has been reliable and equal, or better, than those of other manufacturers that we have used.

If you require any additional information, please contact the undersigned.
